About Treace Medical Concepts

Treace Medical Concepts, Inc. is a medical technology company with the goal of advancing the standard of care for the surgical management of bunion and related midfoot deformities. Bunions are complex 3-dimensional deformities that originate from an unstable joint in the middle of the foot and affect approximately 67 million Americans, of which Treace estimates 1.1 million are annual surgical candidates. Treace has pioneered and patented the Lapiplasty[®] 3D Bunion Correction[®] System – a combination of instruments, implants, and surgical methods designed to surgically correct all three planes of the bunion deformity and secure the unstable joint, addressing the root cause of the bunion and helping patients get back to their active lifestyles. To further support the needs of surgeons and bunion patients, Treace offers its Adductoplasty[®] Midfoot Correction System, designed for reproducible surgical correction of midfoot deformities, two systems for minimally invasive osteotomy procedures, namely the Nanoplasty[®] 3D Minimally Invasive Bunion Correction System and the Percuplasty[™] Percutaneous 3D Bunion Correction System, and the SpeedMT[®] MTP Fusion System. Treace continues to expand its footprint in the marketplace by extending its SpeedPlate[®] rapid compression implant platform to new applications, as well as providing surgeons with advanced digital solutions with its IntelliGuide[®] patient specific, pre-op planning and cut guide technology.
